truepic

Accelerate your path to C2PA in production

Empower your media with cryptographic authenticity through production-grade, commercially supported and robust SDKs, libraries and services, powered by Truepic and integrated seamlessly by G&L.

Why it matters

In today's digital landscape, ensuring the authenticity of your content is crucial. Whether you're a broadcaster, news agency, or content creator, the risk of misinformation and manipulated media is ever-present. G&L's solution offers a trusted path to content transparency by leveraging C2PA standards and Truepic's proven tools.

We provide a ready-to-deploy set of SDKs and libraries to sign, verify, and display your digital content's provenance, backed by G&L's decades of integration expertise.

Tailored integration & support from G&L

Streamline and optimize your content authenticity workflow with G&L's flexible integration services, adaptable infrastructure support, and expert guidance.

Why it matters

Not just a toolkit – our offering includes comprehensive support to integrate Truepic's tools into your existing workflows, whether on-prem, cloud, or hybrid. G&L ensures your transition to C2PA standards is smooth, secure, and customized to your needs. Our infrastructure services provide the necessary backbone or utilize the ones you already have.

Truepic Product	Environments	Capture	Sign	Validate	Display
iOS and Android SDKs	mobile app	✓	✓	✓	
C2PA Library and CLI	server, desktop		✓	✓	
Content Credentials Display	browser, app			✓	✓
